Professional Summary

Junior software developer with professional experience maintaining VB6 systems and migrating data between databases. Developing Marfran, an e-commerce project built with React, TypeScript, C#/.NET, and PostgreSQL, with frontend and API tests. Seeking a role in web or backend development.

Professional Experience

Junior Software Developer Aug. 2024 – May 2025
Visual Software Ltda. *Quedas do Iguaçu, PR, Brazil*

- Maintained a legacy VB6 system, implementing features and fixing software issues and database-related routines.
- Converted data from third-party systems for use in Visual Software, working with different databases to make the information available in the target system.
- Developed an internal tool using FastReport, DevExpress .NET, SQL connectors, and APIs to support data imports.

Project

Marfran Imports | *React, TypeScript, C#/.NET, PostgreSQL* In progress

- Developing an e-commerce application with a product catalog and search filters, product pages, an admin dashboard, and basic order creation.
- Connecting the React and TypeScript frontend to a C#/.NET REST API and PostgreSQL to retrieve and manage products and orders.
- Maintaining automated frontend tests with Vitest and React Testing Library and API tests with xUnit.

Education

Pratt Community College Pratt, Kansas, USA
Computer Science; studies discontinued *Aug. 2025 – May 2026*

Federal University of Technology – Paraná (UTFPR) Pato Branco, PR, Brazil
Systems Analysis and Development; 3 semesters completed (enrollment on hold) *Feb. 2023 – May 2025*

Technical Skills

Current stack: C#, .NET, React, TypeScript, PostgreSQL, REST APIs
Data and legacy systems: SQL, VB6, data migration, FastReport, DevExpress
Testing and tools: Vitest, React Testing Library, xUnit, Git

Languages

Portuguese: Native
English: Advanced
